Innovative Storage Rack Systems for Modern Industry

The Heavy-Duty Multi-Tier Rack from Binzoom Engineering Solutions is engineered for high-density storage where floor space is limited but vertical expansion is possible. This system is ideal for warehouses, logistics hubs, and industrial facilities that require efficient utilization of cubic space.

Multi tier racking Systems

Built for strength, flexibility, and performance — Binzoom's Multi-Tier Racks are the smart choice for scalable, high-load storage solutions.

Slotted Angle Racks

Binzoom's Slotted Angle Racks offer a flexible and economical storage solution for light to medium-duty needs. Easy to assemble and adjust, these racks are ideal for offices, warehouses, retail stores, and workshops.

Pallet Racking Systems

Binzoom's Pallet Racking Systems are designed for heavy-duty warehouse storage, allowing efficient handling of palletized goods using forklifts. Perfect for high-volume inventory and fast movement.

Three Side Covered Racks

Binzoom's Three Side Covered Racks provide enclosed storage with added protection from dust, damage, and unauthorized access. Ideal for organizing sensitive or high-value items.

Perfect for Long & Bulky Items

Binzoom's Cantilever Racks are designed to store long, heavy, or irregular-shaped items like pipes, rods, lumber, and steel sections with ease. The open-front design allows fast loading and unloading using forklifts or manually.

Three-Tier Rack System

Binzoom's Three-Tier Rack System is built to optimize vertical space by creating three levels of storage, ideal for high-density warehousing where floor space is limited.

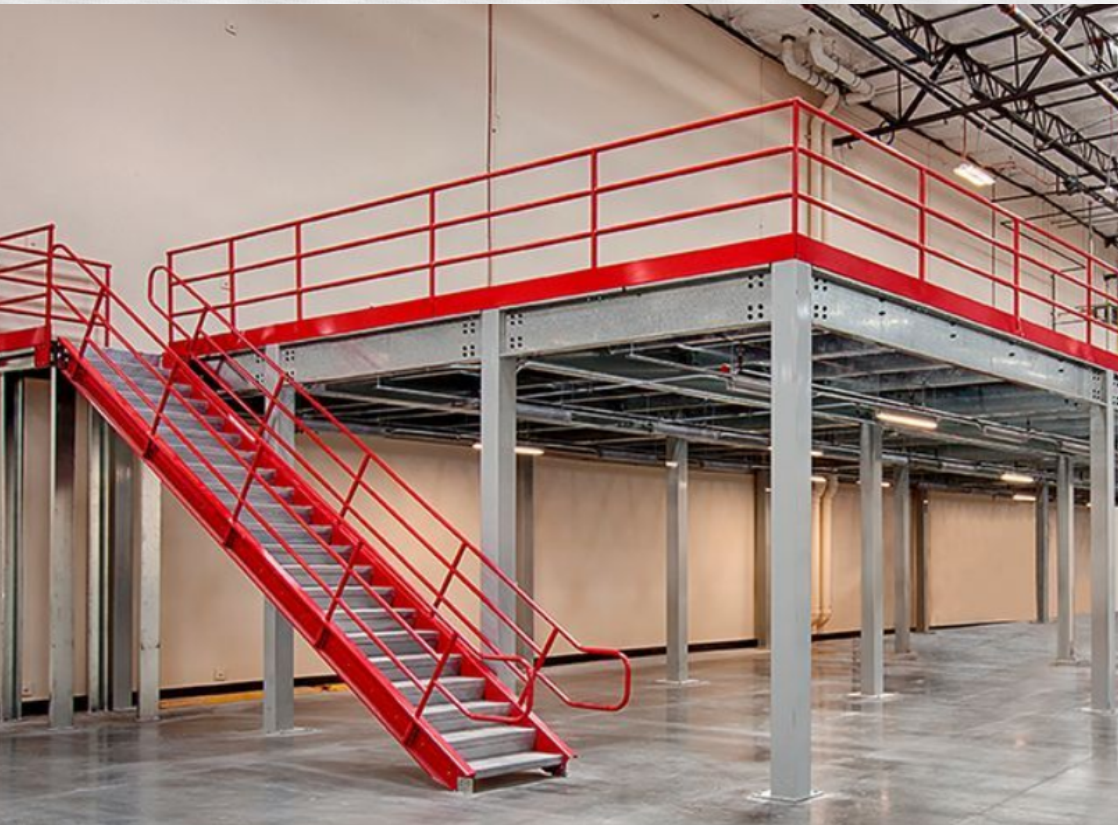

Double Your Space Without Expanding Your Building.

Binzoom's Mezzanine Floor Systems offer a smart way to utilize vertical space by creating an intermediate floor within your existing facility. Ideal for offices, storage, or workstations above ground level.

Features:

- Heavy-duty steel construction
- Customizable layout and load capacity
- Quick installation with minimal disruption
- Options for stairs, railings, and partitions

Maximize Vertical Space. Add a Floor Without Construction.

Binzoom's Mezzanine Floors transform unused overhead space into productive storage or working areas — without altering your building structure.

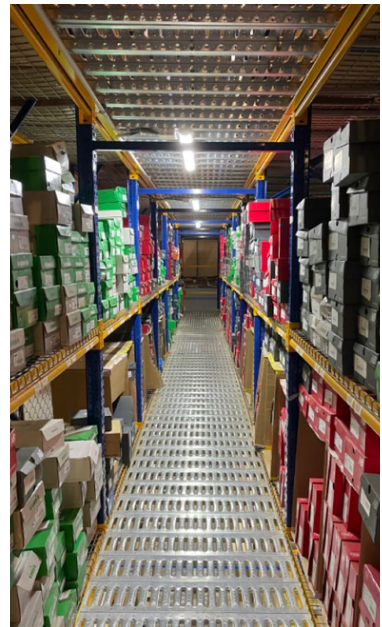

Safe Access to Elevated Storage.

Binzoom's industrial staircases are designed to provide safe and convenient access to mezzanine floors, multi-tier racks, and elevated platforms.

Strength and Flexibility in One

Binzoom's Perforated Channels offer a versatile, durable solution for rack shelving systems, supporting structural integrity while providing easy customization for various storage needs.

Strong Yet Lightweight Storage Solution

Binzoom's Lite Heavy Duty Racks are designed to offer a balance of strength and flexibility, making them ideal for medium to heavy-duty storage requirements. Perfect for warehouses, retail stores, and industrial environments.

Features:

- Robust steel frame construction
- Lightweight yet strong
- Easy to assemble and adjust
- Space-saving design with adjustable shelves

Ideal for: Warehouses, logistics centers, and commercial storage.

At Binzoom Engineering Solutions, we are committed to delivering high-quality storage rack solutions that meet the diverse needs of industries, businesses, and warehouses. With years of expertise in design and manufacturing, we offer a comprehensive range of customizable storage racks, including heavy-duty, multi-tier, cantilever, and mezzanine floor systems. Our racks are built for durability, efficiency, and ease of use, making us the trusted partner for businesses looking to optimize their storage space.

Maximize Storage with Vertical Expansion

Binzoom's Multi-Level Racks are designed to offer efficient, space-saving storage by creating multiple levels of storage within a single rack system. Ideal for high-density storage needs in warehouses and retail spaces.
